

Situation: A chemical spill in a manufacturing facility

Event trigger: An employee witnesses a chemical spill and uses InSite Eyewitness on their mobile phone to notify security and operations

What happens next...

1. The event is automatically logged in Maxxess InSite
2. Two-way communications automatically activated with all registered users on-site; voice annunciation is automatically activated instructing affected employees to go to mustering points
3. Surveillance system automatically switches camera view dependent on the chemical spill alert message that comes in
4. Operations management notifies EPA on the nature and location of the spill in accordance with the organization's policy and procedures. Admin personnel alerted to the spill and referred to review approved procedures
6. EPA/Internal hazmat team responds and rectifies situation
7. Employees receive a mobile broadcast to advise them on status with instructions to resume operations
8. All associated data stored in Maxxess Insite reviewed to verify compliance and to offset potential liabilities
